Additionally, for instructors, MindTap allows you to: â Control what content students see and when they see it with a learning path that can be used as-is or matched to your syllabus exactly. The maximum number of products that can be compared is 4. Indeed, of course, whole chapters can be taken in different orders. Modules can also be covered in a different order. â MindTap helps students stay organized and efficient with a single destination that reflects whatâs important to the instructor, along with the tools students need to master the content. This organization makes it easy for instructors to assign part of a chapter per day instead of a whole chapter per week. . printed in disappearing ink, programmed to fade within ten years of publication, so that I will not be embarrassed by statements that will look primitive from some future perspective.â I would say the same thing today, except that I would like for the ink to fade faster. I hope that readers of this book will remember that message even after they forget some of the details. Each chapter is divided into modules; each module begins with an introduction and finishes with a summary. â Create a unique learning path of relevant readings and multimedia and activities that move students up the learning taxonomy from basic knowledge and comprehension to analysis, application, and critical thinking. Unfortunately, it is easy to get so bogged down in memorizing facts that one loses the big picture, or its affiliates. By seamlessly integrating course material with videos, activities, apps, and much more, MindTap creates a unique learning path that fosters increased comprehension and efficiency. For students:â MindTap delivers real-world relevance with activities and assignments that help students build critical thinking and analytic skills that will transfer to other courses and their professional lives. Biological psychology is the most interesting topic in the world. â Integrate your own content into the MindTap Reader using your own documents or pulling from sources like RSS feeds, YouTube videos, websites, GoogleDocs, and more.
